Enter to the world of
Quality & Performance

Redefining excellence!

Time immemorial began the quest of mankind to seek higher quality of life and his tireless march in seeking greater comfort and safer shelter continues ceaselessly into future. Fruits of this relentless pursuit are our cool air conditioned homes smack in the middle of sweltering deserts where mechanical engineering has taken on a whole new meaning today....and continues to add new dimensions to our lives tomorrow.

Go Green - the New Mantra

Controlling temperature within enclosed spaces - be it residential structure, office premises, hotels, hospitals to anything - form an important component of modern engineering. However, excellence in maintaining those temperatures at high consistency and low energy consumption is the new mantra of "Green Engineering"

Air Leakage - the Problem ?

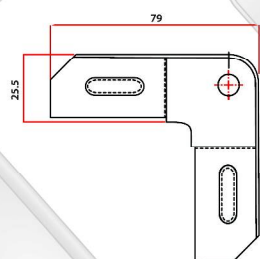

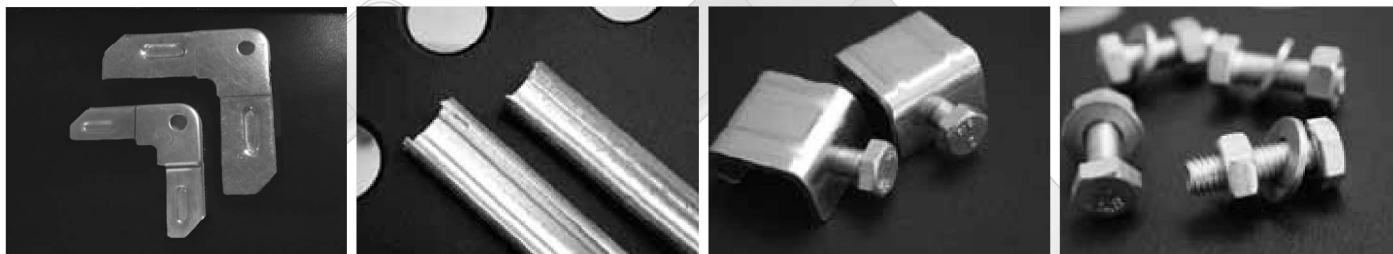

Whether it is heating, cooling or ventilation systems, the inevitable yet heavy leakage is the concern of all HVAC consultants & contractors. Leakages can reduce efficiencies, and thus we have CUBE for the best quality & performance in flanging system.

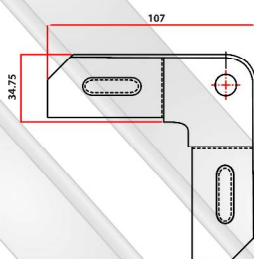

Cube Flange - The Answer ...!!

To the menace of air leakage there are many contributing factors a few of which are

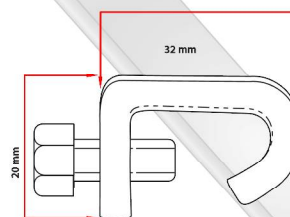

■ Flanges without integral sealant ■ Flanges made of sub-standard raw material
■ Flanges galvanized with inadequate quantity of zinc coating ■ Flanges made on obsolete or antiquated machines.
Cube flanges prove a perfect solution to all these problem. Its special features help in arresting leakage considerably.

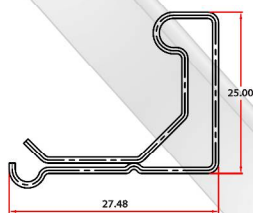

Cube Corner - 25 mm

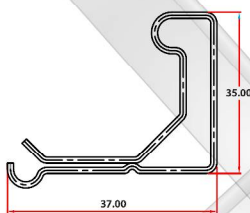

Cube Corner - 35 mm

Cube G Clamp - 40 mm

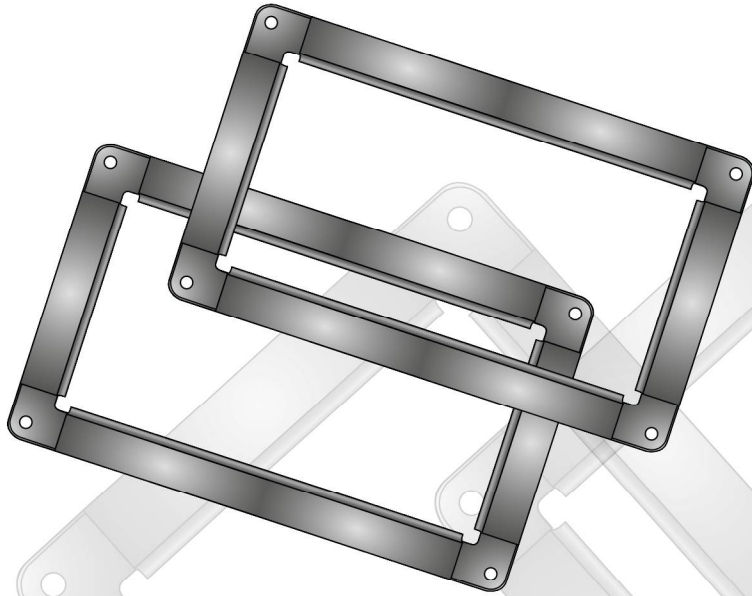

Cube Flange - 25 mm

Cube Flange - 35 mm

Construction features

- Available in standard metric sizes of 25mm & 35mm
- Fully complies with DW144 & SMACNA Edition 2005
- Choice of material type and gauges to suit specifications and requirements
- Integral pocket with non-toxic sealant
- Full range of accessories to suit all sizes of flanges.

Cube Flanges

Premium quality CUBE Flange comes with integral sealant which curtails seepages significantly. Integral sealant help flange cling to duct body tightly providing firmness & stability.

Efficient, Economical and Reliable

Available at best prices, CUBE flanges are made of G.I. sheets which conform to all major HVAC constructional standards followed.

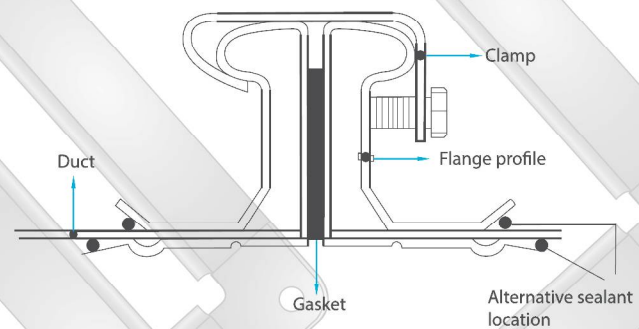

A Wider Acceptance

CUBE flanging systems has got the attention of HVAC contractors of national & international repute. Having tried & tested, they now recommend CUBE on many prestigious project.

Strong Technical Support

You can caount on our competent and qualified engineering & production teams working round the clock, ensuring quality in execution of any complex design.

ISO 9001-2000 Certified Company
